Professional Summary

Analytical and detail-oriented Chemical Engineering graduate with a Second Class Upper Division (CGPA: 4.39/5.00) and hands-on experience in laboratory research, analytical testing, process optimization, and technical documentation. Experienced in conducting laboratory experiments, reaction kinetics studies, quality control testing, experimental data analysis, and scientific reporting through academic research and industrial training in petroleum refining, fertilizer manufacturing, and water treatment. Proficient in Microsoft Excel, Power BI, Aspen HYSYS, Design-Expert, and MATLAB for data analysis, process simulation, statistical modelling, and technical reporting. Recognized for strong problem-solving, collaboration, and communication skills, with a commitment to quality, safety, and continuous improvement. Eager to contribute to a dynamic Research & Development team by supporting product development, laboratory operations, technical documentation, and scientific innovation.

Professional Experience

07/2026 – Present
Makurdi, Benue State

Data Analyst (NYSC)

Hub 17 Innovation Space

- Collect, clean, validate, and analyse datasets to support business intelligence and organizational decision-making.
- Develop interactive dashboards and analytical reports using Microsoft Excel and Power BI to monitor key performance indicators.
- Perform data transformation, validation, and quality assurance to ensure data accuracy, consistency, and integrity.
- Analyse trends and generate actionable insights that support operational improvement and strategic planning.
- Prepare periodic reports and presentations for management and project stakeholders.
- Collaborate with multidisciplinary teams to identify business requirements and provide data-driven solutions.
- Maintain databases while ensuring data confidentiality, security, and regulatory compliance.
- Support the automation of reporting processes through advanced Microsoft Excel functions and Power BI.

02/2019 – Present
Bauchi, Nigeria

Operations Manager

A-Z Computers Café

- Managed the daily operations of a high-volume digital service centre, ensuring efficient service delivery and customer satisfaction.
- Supervised and coordinated a team of more than 15 staff members, providing training, performance monitoring, and operational support.
- Oversaw administrative records, inventory management, financial reporting, and business documentation to ensure operational efficiency.
- Implemented workflow improvements that enhanced productivity, service quality, and customer experience.
- Prepared operational reports, monitored business performance, and supported strategic decision-making.
- Ensured the confidentiality and secure management of customer information and organizational records.
- Developed staff capacity through continuous training in computer operations, documentation processes, customer service, and digital technologies.
- Demonstrated strong leadership, organizational, communication, and problem-solving skills while managing multiple operational responsibilities.

05/2024 – 12/2024
Bauchi, Nigeria

Industrial Trainee

Bauchi Fertilizer Company

- Supported daily fertilizer manufacturing operations by assisting in production activities and monitoring process performance to ensure safe and efficient plant operations.
- Conducted laboratory quality control tests on raw materials, intermediate products, and finished products to verify compliance with quality standards.
- Collected, analysed, and documented laboratory test results, ensuring accurate technical records for production and quality assurance purposes.
- Assisted in monitoring process parameters, identifying operational deviations, and supporting corrective actions to maintain consistent product quality.
- Participated in routine equipment inspection, preventive maintenance, and troubleshooting activities to improve operational reliability and reduce downtime.
- Worked closely with production, laboratory, and maintenance teams to improve manufacturing efficiency and maintain product consistency.
- Maintained compliance with Health, Safety and Environment (HSE) policies, laboratory safety procedures, and quality management standards.
- Contributed to continuous improvement initiatives by supporting process optimization and operational efficiency across production activities.

06/2023 – 09/2023
Bauchi, Nigeria

SIWES Intern

Tamias Water Factory

- Assisted in industrial water treatment and bottled water production processes, ensuring compliance with production and quality standards.
- Performed routine physical and chemical quality control checks on treated water samples to verify product quality.
- Monitored automated production and bottling operations to ensure efficient plant performance and product consistency.
- Recorded production data and laboratory observations while maintaining accurate operational documentation.
- Supported routine equipment monitoring and preventive maintenance activities to minimize production interruptions.
- Ensured compliance with hygiene standards, quality assurance procedures, and workplace safety regulations.

2025
Bauchi, Nigeria

Research & Project Assistant

Department of Chemical Engineering, Abubakar Tafawa Balewa University (ATBU)

- Conducted laboratory research on hydrogen production integrated with carbon capture technologies, supporting the development of sustainable energy solutions.
- Planned and executed laboratory experiments involving reaction kinetics, process optimization, and statistical modelling to evaluate engineering performance.
- Applied Response Surface Methodology (RSM) using Design-Expert software to optimize process parameters and improve experimental outcomes.
- Collected, validated, analysed, and interpreted experimental data using Microsoft Excel, Design-Expert, and MATLAB, ensuring data accuracy and scientific integrity.
- Assisted in process simulation and engineering calculations using Aspen HYSYS to evaluate process efficiency and operational performance.
- Prepared detailed technical reports, scientific documentation, research presentations, and project findings for academic supervisors.
- Collaborated with research supervisors and multidisciplinary project teams to ensure the timely completion of research activities while maintaining high standards of quality and accuracy.
- Maintained organized laboratory records, research documentation, and experimental data to support project traceability and technical reporting.
- Demonstrated strict compliance with laboratory safety procedures and engineering best practices throughout all research activities.

2020
Kaduna, Nigeria

Chemical Engineering Intern

Kaduna Refining and Petrochemical Corporation (KRPC)

- Assisted process engineers in refinery operations within the Wax Hydro-Treating Unit and Asphalt Blowing Unit, ensuring adherence to operational and safety procedures.
- Monitored and recorded operating parameters to support stable refinery operations and optimize equipment performance.
- Participated in preventive and corrective maintenance activities on refinery process equipment to improve operational reliability.
- Assisted in hydrostatic testing, leak testing, and integrity assessment of heat exchangers and associated process equipment.
- Conducted routine inspections of pipelines and process equipment while supporting equipment integrity monitoring activities.
- Worked collaboratively with engineering and maintenance teams to ensure safe plant operations and continuous process improvement.
- Maintained accurate operational records and complied with refinery Health, Safety and Environment (HSE) standards.
- Assisted in orientating newly assigned industrial trainees on refinery operations, workplace safety, and standard operating procedures.

Education

2018 – 2025
Bauchi, Nigeria

Bachelor of Engineering (B.Eng.) in Chemical Engineering

Abubakar Tafawa Balewa University (ATBU)

- Second Class Upper Division
- CGPA: 4.39/5.00

Relevant Coursework:

- Chemical Reaction Engineering
- Process Design
- Process Optimization
- Heat and Mass Transfer
- Thermodynamics
- Fluid Mechanics
- Transport Phenomena
- Separation Processes
- Process Control
- Engineering Statistics
- Numerical Methods
- Engineering Mathematics

Core Competencies

Research & Development (R&D)	Laboratory Research & Experimentation
Analytical Chemistry & Quality Control Testing	Experimental Design & Process Optimization
Product Development Support	Technical Documentation & Scientific Reporting
Stability Studies & Experimental Data Analysis	Response Surface Methodology (RSM)
Reaction Kinetics	Chemical Process Engineering
Process Simulation (Aspen HYSYS)	Statistical Analysis (Design-Expert & Microsoft Excel)
Root Cause Analysis & Problem Solving	Quality Assurance (QA/QC)
Health, Safety & Environment (HSE) Compliance	Cross-functional Collaboration
Project Coordination	Continuous Improvement
Attention to Detail	Effective Communication

Technical Skills

- | | |
|------------------------------|------------------------------|
| • Aspen HYSYS | • Design-Expert |
| • MATLAB | • Microsoft Excel (Advanced) |
| • Microsoft Power BI | • Microsoft Word |
| • Microsoft PowerPoint | • Laboratory Experimentation |
| • Analytical Chemistry | • Quality Control Testing |
| • Experimental Data Analysis | • Process Simulation |
| • Engineering Calculations | • Reaction Kinetics |
| • Process Optimization | • Statistical Modelling |
| • Technical Report Writing | • Scientific Documentation |
| • Analytical Thinking | • Problem Solving |
| • Collaboration | • Communication |
| • Adaptability | • Time Management |
| • Stakeholder Engagement | • Attention to Detail |
| • Fast Learning Ability | |

ENGINEERING PROJECTS

Design of a Hydrogen Production Plant with Integrated Carbon Capture System

- Designed a hydrogen production plant using Steam Methane Reforming (SMR) integrated with a biochar carbon capture system to improve hydrogen production efficiency while reducing carbon emissions.
- Performed detailed mass and energy balance calculations, equipment sizing, process design calculations, and process evaluation using chemical engineering principles.
- Developed Process Flow Diagrams (PFDs) and assessed process performance, environmental sustainability, and economic feasibility.
- Evaluated process efficiency and identified opportunities for optimization through engineering analysis and simulation.
- Prepared comprehensive engineering reports and technical documentation to support project design and evaluation.

Kinetics and Optimization of Enzymatic Hydrolysis of Corn Cob Using Response Surface Methodology

- Conducted laboratory experiments to investigate the enzymatic hydrolysis of corn cob for glucose production.
- Designed experiments using Response Surface Methodology (RSM) to optimize enzyme concentration, pH, and reaction time.
- Performed reaction kinetics studies and developed predictive statistical models using Design-Expert software.
- Analysed experimental results using Microsoft Excel and Design-Expert to validate optimized operating conditions.
- Prepared technical reports and presented scientific findings while maintaining accurate laboratory records and documentation.

Certifications

- Certificate of Completion – Graphic Design, Nigerian Youth Academy (NIYA), Federal Ministry of Youth Development & Sapphital (2026)
- National Trade Test Certificate in IT Operations, Federal Ministry of Labour and Employment, Bauchi
- Certificate of Completion – Navigating the Future: Bridging the Gap for Global Competitiveness, TETFund & Agro Technical Ltd (2026)
- Certificate of Participation – Digital Literacy for All (3-Day Intensive), National Information Technology Development Agency (NITDA) & MindTheGap (2026)
- Diploma in Computer Operations, A-Z Computers, Bauchi (2019)
